

Behavioral Health—Strategic Design Innovations that Improve Treatment Outcomes, Safety and the Bottom Line

Agenda

The Workshop

The challenges created by today’s growing mental health and substance abuse crises reach far beyond the behavioral health unit into emergency departments, outpatient clinics and throughout acute care settings.

To support improved care and enhance staff safety, today’s design, facility and care professionals have to advance their understanding of design’s impact on behavioral health care and learn how to incorporate the best and latest design solutions throughout the healthcare setting.
