

EcoVeil Sheer™

Product Innovation Highlights

Mecho's EcoVeil Sheer is a 100% polyester shade cloth that's PVC-free and flame retardant. The EcoVeil Sheer shade cloth features individually pigmented yarns with an attractive, distinctive twill pattern making it the ideal window covering in healthcare facilities to maximize the healthy properties of natural light.

Solving a Healthcare Challenge

Mecho's EcoVeil Sheer was born from the challenge to create an attractive, durable shade cloth that would pass the NFPA 701® without chemical additives while being incorporated into complete Cradle to Cradle Certified™ (C2C) manual shade systems.

Solution

EcoVeil Sheer's broken-twill weave uses translucent, polyester yarns to diffuse daylight while maintaining views. EcoVeil Sheer is the first shadecloth to meet the Healthier Hospitals Initiative Safer Chemicals Challenge, and has also earned Best of NeoCon Silver 2017, a Cradle to Cradle™ Material Health Certificate, and a Nightingale Award, which honors products that contribute to healing.

Mecho's EcoVeil sheer is the ideal solution for light and solar heat control in healthcare facilities, educational institutions, nursing homes, hotels and even residential buildings.

Features

- 100% polyester shadecloth
- No chemical flame retardants
- First shadecloth to pass NFPA 701® without adding additional chemicals
- Recyclable & PVC free
- One percent and three percent openness
